e. The substance is being released due to manure, urine and flatulation. This is a continuous notification report under section 304 of the Emergency Planning and Community Right to Know Act for an animal feeding operation pursuant to the EPA final rule affective Jan 20 2009. While there is a question whether feeding operations should be required to report these admissions since they come from naturally occurring manure, urine and flatulation, I am reporting them to be cautious and as required by the EPA final rule. A written report will be submitted within 30 days from today.
